VLSI is a member of the SYNLAB Group

The SYNLAB Group is the leading laboratory services provider in Europe covering a huge range of health and environmental testing. SYNLAB’s veterinary business offers a range of tests as well as diagnostic advice for companion animals, horses, reptiles and birds, as well as farm animals and exotic species.

SYNLAB has expertise in veterinary diagnostics across Europe including Germany, Italy and Belgium. The recent acquisition of Veterinary Pathology Group (VPG) extends SYNLAB’s repertoire of veterinary diagnostic services into the UK and the Republic of Ireland.

SYNLAB UK and Ireland’s CEO Stuart Quin commented that “SYNLAB was attracted to the VPG business given its outstanding reputation in providing high quality diagnostics for veterinary surgeons and by the very strong expertise of its management team”.

A MEMBER OF SYNLAB
We provide an expert, accessible, fast, innovative, private courier-based diagnostic service. We concentrate on getting the basics right while pushing the boundaries of diagnostic technology. We are the UK benchmark for cytology, histopathology, immunohistochemistry, exotics, diagnostic PCR and toxicology. Our services are strengthened by shared philosophy, expertise and ownership.

We are the Veterinary Pathology Group.

Andrew Torrance and Mark Diamond co-founded a Diagnostic Laboratory (TDDS) in the Innovation Centre at the University of Exeter. The founding principles can be summarised as “Accessibility, Expertise and Professional Freedom”.

Six further laboratories followed as joint ventures with like-minded professionals:

2004
CTDS with Nick Carmichael and Karen Scott in Leeds.

2007
VLSI with Lucy Gaffney in Ireland.
TDDS in Ringwood.

2008
PTDS with Roger Powell in Hitchin.
Bridge Pathology with Tim Scase in Bristol.

2012
TDDS expanded again in Exeter with the launch of Molecular Testing, a diagnostic PCR laboratory with Dr Iain Peters.

2013
CTDS launched a unique toxicology service with the fastest turnaround of results available in the UK.

2014
Our laboratories became collectively known as The Veterinary Pathology Group (VPG).

The recent acquisition of Veterinary Pathology Group (VPG) extends SYNLAB’s veterinary business to the United Kingdom and the Republic of Ireland.

SYNLAB has veterinary laboratories in Germany, Italy, Belgium and other European countries.
